v'Tvoji gnadi naſs obdershi
Zhistu ſerze stvari nam.

4.

Mi tebi na pruti gremo
Sei si ti blisu per naſs ,
Dei , de h'tebi priti smemo
Sako uro , saki zhaſs.
S'tabo se savesat ozhmo
O Gospod! v'lubesni sdei ,
Od tebe lozhit' se nozhmo
Do smerti , no vekumei.

There are several classic spatial filters
eliminating high frequency noise from im
filter, the median filter and the closing
frequently used. The mean filter is a lowp
filter that replaces the pixel values with t
mean. It reduces the image noise but blurs
The median filter calculates the median o
borhood for each pixel, thereby reducing t
Finally, the opening closing filter is a ma
phological filter that combines the same n
and dilation morphological operations in c
